Instructions to Authors for AsTEN Journal

Files should be in MS Word format only. Figures and tables should be embedded and not supplied separately. Please make sure that you use as much as possible normal fonts in your documents. Special fonts, such as fonts used in the Far East (Japanese, Chinese, Korean, etc.) may cause problems during processing. To avoid unnecessary errors, you are strongly advised to use the ‘spellchecker’ function of MS Word.

Article Structure

All intending authors must register at the Normal Lights’ online platform: http://po.pnuresearchportal.org/ejournal/index.php/asten. If you are already enrolled as an author, you may simply log in and begin the submission process.

Articles should be prepared in the following order:

**Title.** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible. The title is not more than 12 words and be written with 16 font size and centered. The rest of the details in the title page should be in 10-point Arial.

The title page should include:

A concise and informative title

The name(s) of the author(s)

The affiliation(s) and address(es) of the author(s)

The email address of the corresponding author

**Abstract.** The abstract is a summarization or synopsis of the complete document, written in one paragraph, which should include these elements: Purpose, methodology, major findings, conclusion and recommendations.
Abstract Writing Style

• Use specific words, phrases, concepts, and keywords from your paper.

• Use precise, clear, descriptive language.

• The abstract should be written with correct English-language grammar and spelling.

• Write from an objective, rather than evaluative, point of view.

• Define unique terms and acronyms the first time used.

• Write one paragraph, from 100 to 150 words in length and be written with 10 font size.

• Use complete sentences and use verbs in an active voice.

• The first line must not be indented from the rest of the text.

• One double space, 10-point Arial, separates the abstract, the affiliation, and the first section of the article.

Keywords: Immediately after the abstract, provide a maximum of 5 keywords to be written with 10 font size in alphabetical order.

Key Elements of an Article

1. Introduction: Introduction section should explain the theoretical background, related research or literature survey, the practical applications and the nature and the purpose or rationale of the article. Cited literature must be within a decade range.

2. Methodology: Methodology section that describes the participants (e.g., demographics, selection criteria, and group assignment), the materials (e.g., task[s], equipment, instruments, including a discussion of their validity and reliability, if appropriate), and the procedures employed in the study such as treatment(s) and data analysis.
3. **Results (Findings) and Discussion:** Results should be clear and concise. Discussion should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature. For highly qualitative studies, we require separate sections for “Findings” and “Discussion”

4. **Conclusion and Recommendations:** The main conclusion of the study may be presented in the conclusion section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

*(Authors may deviate from the aforementioned key elements as subsections when doing/ writing qualitative research. But, in principle, the four elements are still in this article.)*

**Acknowledgements**

*(when appropriate): Collate acknowledgements in a separate section at the end of the article before the references and do not include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.) and the research sponsors*

**Formatting your document**

The manuscript should have a title followed by an abstract consisting of not more than 150 words that summarizes the purpose, methods and results of the study, with 3-5 key words.
